NIKOS CHRISTOFORIDIS

Creative React Developer | Web & Graphic Designer

Computer Science Graduate

(ATEI Thessaloniki)

I am a professional Front-End Developer specializing in crafting pixel-perfect, responsive websites and immersive web applications. My expertise includes React, Next.js, and TypeScript, complemented by advanced CSS techniques and libraries like GSAP and Framer Motion for creating dynamic animations. I also have experience with Three.js, enabling the integration of 3D elements for engaging and interactive user experiences.

As a UI Designer, I excel in website design, combining a sharp eye for detail with a deep understanding of layout design, color theory, and typography. I leverage industry-leading tools like Figma and the Adobe Suite to create clean, modern, and functional designs that balance aesthetics with usability, ensuring a seamless experience across all devices.

I run a small design studio, PixelPerfekt, where I also work as a freelancer, bringing together all my development and design skills to deliver tailored, high-quality digital solutions for clients.
